**Table 1: Categorisation and number of Towns and Duration of Data Collection**

Population of the town	Category	Estimated duration of data collection (Days)	Number of towns
0 – 5,000	1	2	134
5,001 – 10,000	2	3	23
10,001 – 30,000	3	5	40
30,001 – 50,000	4	6	30
50,001 – 80,000	5	8	24
80,001 – 120,000	6	10	14
Population > 120,000	7	+10	12
			277

The table shows the estimated duration of the data collection exercise. The total duration of the data collection exercise is estimated at 500 days. When determining the duration of the data collection exercise in each town logistical constraints were taken into account (travelling to and from). In some cases travelling will prolong the data collection exercise whereas in other parts of the country the vicinity of towns may even allow for data collection taking place simultaneously in several towns.
